### *A speedy Cure for the Ague.*

**A**BOU T an hour before the return of the fit, let some friend or attendant catch a common house spider, and wrapping it first in its web, then in some moistened wafer paper, or honey, and give it to the party afflicted by way of bolus: if the disorder is but slight, one dose often effects a cure; but it seldom requires at most above three or four; and the effect of this medicine is for the most part seen the first time of taking it, the fits being less violent, and shorter in duration.

### *A Cure for the Consumption.*

**T**HE following simple cure for that wasting disorder the *Consumption*, has lately been discovered, having proved successful in many dangerous cases in Carolina, and has ministered greatly to the relief of several persons in Pennsylvania and other places.---Take of the bark of the small wild Cherry-Tree, and the low land Beech-Tree, (not Button-Wood) equal quantities; of which make a strong decoction, and give a pint thereof per day, in several portions, or more if the stomach will bear it; and to render it the more palatable, it may be mixed with a little weak toddy or tea, as it may be most agreeable to the patient: altho' a few days use of it may occasion sensible alterations for the better in the afflicted person, yet this course of drinking it must be persisted in for at least three months to render the cure effectual.

### *Directions for making Soap with Pot-Ash.*

**T**O every pound of Grease put half a pound of Pot-Ash, with a little water at first, and let it simmer a little; then keep it boiling and filling up with water as is done with other Soap with Lye, till you have enough for your Pot-Ash and Grease; but would advise not to be too craving in making more than the quantity will bear: After you have put as much water in as you intend, let it boil steadily one hour or a little more. One pound of good Pot-Ash will make a pail of good Soap; ten pounds will make a barrel; but fifteen pounds will make it much better, almost equal to hard Soap.---When you begin put four pails of rain water at first with your Pot-Ash and Grease to every barrel of Soap; eight pails to two barrels, and so in proportion.

☞ The anniversary Convention of the Congregational Ministers is be'd at Poston the Thursday following the last Wednesday in May ; On which Day a Sermon is preached before them, and a Collection made for charitable purposes.

By the Laws of the Commonwealth the inhabitants of each town within the same are to take due care from time to time to be constantly provided with an able, learned, orthodox minister or ministers, of good conversation, to dispense the word of God to them, who are to be suitably encouraged and sufficiently supported and maintained by the inhabitants thereof. — Also every town, having 50 householders and upwards, are to be constantly provided with a School-master to teach children and youth to read and write : — and where any town has the number of 100 families or householders, there is also to be a grammar school set up therein, and some discreet person, well instructed in the tongues, procured to keep the same, and be suitably encouraged and paid by the inhabitants. —

The neglecting to have ministers and school-masters, or not making suitable provision for them, is to be remedied by complaint to the quarter sessions of the peace for the county wherein any delinquent town lies. —

The stated Meetings of the Society are on the second Wednesday of APRIL; first Wednesday of JUNE, and third Wednesday of OCTOBER annually.

The design of the foregoing Institution is, "to promote medical and surgical knowledge, enquiries into the animal œconomy, and the properties and effects of medicines," by encouraging a free intercourse with the gentlemen of the faculty throughout the United States of America and a friendly correspondence with the eminent in those professions throughout the world; as well as "to make a just discrimination between such as are duly educated and properly qualified for the duties thereof, and those who may ignorantly and wickedly administer medicine, whereby the health and lives of many valuable individuals may be endangered, and perhaps lost to the community."

In so laudable and useful an intention the Massachusetts Medical Society, feel the most solid encouragement in calling upon the wise and observant of the faculty, and upon the curious in every profession, to communicate whatever may appear to them conducive to this great undertaking—they would wish that the most trifling observations, if pertinent, may not be withheld—every communication will be gratefully received and treated with the utmost candour.

For the purpose of enabling the people at large (who might otherwise be incapable of fully discerning the qualifications of candidates for practice) to distinguish the persons upon whom they may rely, they have, upon the principles of their charter, appointed five censors whose duty, as assigned them, is, to examine all candidates for the practice of physic and surgery who shall offer themselves therefor, and to give letters testimonial of their approbation, to those whom they shall find worthy of public confidence.

The number of this Society, who are inhabitants of this Commonwealth, is at no time to exceed seventy, nor less than ten. --- They are to have a common seal, may sue or be sued, and empowered to make by-laws and rules for the better government of said Society, and to annex fines and penalties not exceeding the sum of 20 l.

The day *after* every stated Meeting is assigned for the examination of all such Candidates for the practice of Physic or Surgery, as shall apply to the recording Secretary on or before the day of the stated meetings.

**BOSTON :** Is the Capital of the Commonwealth of Massachusetts, is pleasantly situated on a peninsula, above 4 miles in compass ; and lies at the bottom of a large bay, defended from the ocean by a great number of delightful islands, and is reckoned one of the safest and most commodious harbours in the world : It is fortified at the entrance by strong forts on Nantasket heights ; and within about a league of the Town, by Castle William and a fort on Governor's island, also on Dorchester hills, Charlestown, and other places :---The Town has been settled about 153 years, and has now in it between 2 and 3000 dwelling-houses, besides other buildings (notwithstanding the destruction made by the British troops in 1775) and about 2500 rateable polls. — In the Town there are 64 streets, 37 lanes, and 17 allies, besides squares, courts, &c. also a great number of convenient wharves, at which ships and other vessels may load and unload without the help of boats ; the principal one for length and convenience is the Long Wharf, being in the centre of the town and running 1700 feet into the harbour. — The country round about is very delightful, and abounds with all sorts of provisions and other necessaries of life : The air is clear and pleasant and perfectly agrees with the constitutions of the inhabitants. — In the year 1735 the Town was divided into twelve wards, in each of which is an Overseer of the Poor, a Fire-Ward, Constable, and Scavenger, who are chosen annually in March ; there was also formerly a Company of foot in each ward, but are now reduced to eight, with a Captain and other officers. At March meeting seven Select-men are also chosen, who have the ordering and managing the prudential affairs of the Town. — The present Select-men are,

John Scollay, Esq;  
Capt. Gustavus Feltows,  
Harbottle Dorr, Esq;  
Nathan Frazier, Esq;

Ezekiel Price, Esq;

**N**OTWITHSTANDING the Publishers having spared no pains to render the foregoing REGISTER complete and correct to the Month of November 1782, there may yet probably some errors occur, for which they not only crave the pardon of the Public, but hope they will receive it with indulgence. make due allowance for its imperfections, and receive it favorably, as a really necessary, useful publication. — They with gratitude acknowledge their obligation to those Gentlemen who have generously assisted in furnishing them with materials and in treating their assistance yearly, as a work of this nature will always need correction and alteration by the death, promotion, or addition of the officers of the civil, military and ecclesiastical lists; and it is desired seasonable information may be given thereof, in order that the Register in future may be more perfect. —
